

“Wildfire Walkers are built from high quality parts and materials at a price that is affordable to all horse owners. ”

WILDFIRE WALKERS

FREESTYLE HORSE WALKER

The most efficient way to save time and money, while keeping your equine athlete in peak physical condition. Well conditioned horses perform and behave better. And best of all, they are less likely to be injured. Panel walkers allow horses to move freely, keeping them relaxed and traveling naturally.

DETAILS AND SPECIFICATIONS

- Built from heavy duty pipe and fittings.
- Built in base which allows for easy set up and no extra cost for a concrete base.
- Portable, and can be set up and taken down with no tools required.
- Warranty included for motor, gearbox, control panel, as well as structural warranty.
- Whisper quiet operation, virtually no noise at all.
- Control box comes fully wired with cable included so it can be run underground and mounted outside of fences.
- Divider panels are 80 inches wide.
- 20 second delayed start/stop and for speed increase and decrease.
- Almost no maintenance required.

ADDITIONAL OPTIONS

- Shipping options can be provided for additional cost.
- Four or six horse options.
- Standard 60 foot design with custom options from 40 to 70 feet in diameter.
- Timer
- Charged panel kit
- Additional heater in control panel to operate in winter conditions.
- Programmable settings to switch from manual to automatic speed and directional operations.
- 110 and 240V options

WILDFIRE
CLASSIFIEDS

Find us on the Wildfire Classifieds website - www.wfclassifieds.ca

Designed with the health and safety of your horse as the number one priority.

Some designs might offer optimal mechanical operation of the unit, but our goal is to ensure that if there was ever any problem or issue, the belts will slip so that damage or injury can be prevented.

Light weight panels that are mounted flexibly to the arms, and will swing over or beside the horse if needed.

Would you rather straighten or replace a \$100 panel, or spend time and money doctoring and rehabilitating a horse?

Would you prefer the belt to slip if your horse stopped, or would you like the divider panel to hit them and force them to move or lose their balance?

Do not forget that the **ONLY** purpose of this machine is to aid in the health and well being of the animal inside it.
